WAR DEPARTMENT, OFFICE OF THE SURGEON GENERAL,  
ARMY MEDICAL MUSEUM AND LIBRARY,

*Washington, August 1, 1916.*

Maj. Gen. WILLIAM C. GORGAS,  
*Surgeon General, U. S. Army.*

GENERAL: There is presented herewith the twenty-first volume of the Second Series of the Index-Catalogue of the Library of this Office.

This volume includes 7,211 author titles, representing 4,971 volumes and 5,496 pamphlets. It also contains 2,026 subject titles of separate books and pamphlets and 12,175 titles of articles in periodicals.

The Library now contains a total of 224,522 volumes, bound and unbound, of which 191,742 are bound and 337,120 pamphlets, in all 561,642 items (volumes and pamphlets). Exclusive of transactions of societies, the number of current periodicals at present on file in the Library is 1,895.

The following table shows the number of titles in the Index-Catalogue as far as published:

	AUTHOR TITLES.			SUBJECT TITLES.		Portraits.
	Titles.	Volumes.	Pamphlets.	Book titles.	Journal articles.	
Total in First Series.....	176,364	85,663	151,504	168,557	511,112	4,335
Second Series, Vol. I.....	6,346	6,127	6,327	7,884	30,384	.....
Vol. II.....	15,732	6,383	14,802	5,774	21,725	.....
Vol. III.....	11,112	4,873	10,690	10,636	34,314	677
Vol. IV.....	9,628	4,133	8,523	8,828	28,316	.....
Vol. V.....	6,825	2,695	5,957	7,645	40,045	.....
Vol. VI.....	15,589	5,865	14,296	5,962	30,561	.....
Vol. VII.....	6,225	2,692	8,157	13,179	32,522	.....
Vol. VIII.....	10,704	5,330	9,897	5,731	29,684	.....
Vol. IX.....	8,706	2,599	8,291	5,322	31,481	.....
Vol. X.....	10,122	4,690	10,750	10,856	22,622	.....
Vol. XI.....	8,023	4,063	9,311	5,634	34,211	.....
Vol. XII.....	5,476	2,355	5,195	10,996	35,324	.....
Vol. XIII.....	5,566	3,250	4,851	7,678	40,221	.....
Vol. XIV.....	10,019	5,281	8,058	4,065	31,370	.....
Vol. XV.....	8,804	4,688	7,460	3,616	28,328	.....
Vol. XVI.....	9,890	4,670	10,786	3,892	24,135	.....
Vol. XVII.....	2,357	3,850	8,490	3,571	36,898	.....
Vol. XVIII.....	3,865	4,117	2,693	5,223	45,525	120
Vol. XIX.....	3,046	1,353	2,744	3,736	32,739	47
Vol. XX.....	4,566	2,263	3,517	4,151	22,977	30
Vol. XXI.....	7,211	4,971	5,496	2,026	12,175	40
Total to date.....	346,176	171,911	317,795	304,962	1,156,669	5,249

The present volume completes the Second Series of the Index-Catalogue, comprising 21 volumes, or a total of 37 volumes in the First and Second Series. The list of abbreviations in this volume includes all the abbreviations employed in the 21 volumes of the Second Series.

In concluding the Second Series a few remarks about the history and present condition of the Surgeon General's Library and its Index-Catalogue seem appropriate.

Prior to 1836, the Surgeon General's Library started as a small departmental outfit of medical books which had been gathered for the official use of Surg. Gen. Joseph Lovell (appointed 1818), which was added to by Surg. Gen. William A. Hammond and others, and which in October, 1865, amounted to 2,253 volumes. At the end of 1864, Dr. John S. Billings was transferred to the Surgeon General's Office and had, among other duties, nominal if not official care of this collection of books. Some time after, he was permitted to add to this collection by the judicious use of a "slush" fund turned in from the Army hospitals and amounting to about \$80,000. In 1868, the Library, as shown by its printed catalogue, contained 6,066 volumes and in 1871 13,330 volumes. When the "slush" fund was exhausted Dr. Billings obtained suitable appropriations from Congress, so that through the expenditure of a relatively small amount of money the Library at present contains 224,522 volumes, 337,120 pamphlets, and 5,249 portraits of physicians. In building up this collection Dr. Billings and his successors in office practiced rigid economy by making the best bargains with publishers and antiquarian booksellers for purchases in open market, by judicious exchange of duplicates with other medical libraries and private collectors, by writing for public documents relating to medicine all over the world, and by the accession of liberal donations from public institutions and individual medical men. In his valedictory letter, transmitting the last volume of the First Series of the Index-Catalogue to the Surgeon General (June 1, 1895), Dr. Billings states that of the 116,847 books and 191,598 pamphlets which then made up the library at least one-sixth had been presented "either in exchange or as a direct gift." The names of these liberal donors, private and public, up to 1895, have been duly listed in the introductory pages of Volume XVI of the Index-Catalogue (First Series). During the 21 years covered by the Second Series of the Catalogue, there have been few physicians who have not donated some book, pamphlet, or reprint of their own composition, few governmental institutions, universities, laboratories, public libraries, or military and naval establishments which have not contributed some printed document or scientific research of value to medicine. Most of the graduating theses or inaugural dissertations of the great foreign universities have been obtained in this way and practically all documents relating to public health and medical administration generally. Among the donors worthy of special mention are the Library of Congress, the Carnegie Institution of Washington, which has given copies of all its own publications relating to medicine and the biological sciences, and all medical publications which have been sent to it for the use of the Index Medicus; the different medical societies, boards of health, research institutions, commissions, and laboratories, and medical libraries of this country and Europe; and the medical and biological departments and laboratories of the different universities. Of private individuals who have enriched the collections of the Library by liberal voluntary donations, the late Thomas Windsor, of Manchester, England, who died in 1910, bequeathed the most valuable items in his collection of medical books to the Surgeon General's Library, a collection which numbers many rare things in the older medical literature and a unique set of anatomical sketches in water color by Sir Charles Bell; Sir Lauder Brunton (London) has donated a valuable collection of some 328 bound volumes containing essays and papers on experimental physiology and pharmacology, the collection of a lifetime, all duly indexed and catalogued by himself; also, through Dr. F. H. Garrison, a unique collection of autograph letters of modern physicians and a set of *carte de*

*visite* photographs of Carl Ludwig and his pupils; Sir William Osler (Oxford) has been a constant and loyal friend of the Library by way of gifts and otherwise; Prof. Karl Sudhoff (Leipzig) has donated all the publications of his Institute; Dr. Abraham Jacobi (New York) has deposited in the Library his valuable collection of medical autographs; Dr. William S. Disbrow (Newark, N. J.) has aimed to give everything medical in his collection which is not in the Library; Dr. Mortimer Frank (Chicago) has donated a unique collection of photographs of eminent Philadelphia physicians and other items of value; Dr. H. C. Yarrow and other Washington physicians, as also some of the foreign embassies and legations in Washington, have transmitted valuable gifts from time to time. Reprints have been obtained from all and sundry, and the leading medical journals of the country now send to the Library all reprints of papers published in them as they appear. A number of physicians, notably S. Weir Mitchell, Lewellys F. Barker, William S. Thayer, John H. Musser, Rudolph Matas, Henry Hun, and Carl J. Wiggers in this country, and Sir William Osler, Karl Sudhoff, Carl Nicoladoni, and Édouard Nicaise in Europe, have presented complete collections of their reprints and pamphlet publications, bound or unbound. The advantage to individual physicians of leaving bound collections of their pamphlet publications as a permanent deposit in the Library is obvious, and, at the same time, these collections further the economy of library administration by facilitating the matter of indexing the items for bibliographical purposes and by affording permanent access to stationary sets of medical papers to local readers while the loose reprints may be lent to readers in other cities. All the donations enumerated above have been purely voluntary, as this Library has not sought to compete with the other medical libraries of the country in obtaining valuable accessions by gift. The duplicate books and periodicals on hand have been made freely accessible to medical librarians desiring to complete their files, a few rare items having been reserved for exchange purposes.

On November 8, 1912, the Library sustained a grave loss by the death of its principal assistant librarian, Dr. Robert Fletcher, in the ninetieth year of his age, and, four months later, on March 11, 1913, Dr. John S. Billings, the principal up-builder of the Surgeon General's Library and the creator of its Index-Catalogue, died at the age of 75. To these two men is due most of the credit for the redaction of the Index-Catalogue. The general plan of a combined index of authors and subjects, arranged in dictionary order in a single alphabet, and the system of subject rubrics with their cross references, were blocked out by Dr. Billings and Dr. Fletcher prior to the publication of Volume I of the First Series (1880). In the first series the journals were checked for indexing by Dr. Billings, who also arranged and redacted the subject bibliographies, which were then prepared for the printers by Mr. H. O. Hall and others. The author bibliographies were prepared by Messrs. Hall (1875-91), R. E. Colston, Homer Guerrey, and W. T. W. Moritz. The proof reading was supervised by Dr. Robert Fletcher, with Messrs. H. O. Hall, F. L. Apel, and Dr. H. C. Yarrow in the Library, Mr. H. Boernstein and his assistants at the Government Printing Office, Drs. Charles Rice (New York) and James R. Chadwick (Boston). Dr. Fletcher also devised all the abbreviations of periodicals employed in the Index-Catalogue up to the time of his death (1912). Up to this date, the redaction and printing of the Second Series of the Catalogue was supervised by Dr. Fletcher, who also prepared the subject bibliographies during this time, while the author bibliographies were prepared by Dr. F. H. Garrison. Since Dr. Fletcher's death, Dr. Garrison has prepared the subject bibliographies and the abbreviations of periodicals, while the author bibliographies, since 1912, have been prepared by Dr. Albert

Allemann. The proof reading of the Second Series up to 1912 was supervised by Dr. Fletcher, with the assistance of Dr. Alonzo F. Steigers and Dr. F. H. Garrison. Since 1912, the proof reading has been in the hands of Dr. Garrison and Dr. Allemann, with the assistance of Dr. Frank J. Stockman, who has redacted the final list of abbreviations and the list of corrigenda in the present volume. Since 1895, the checking of articles for indexing in medical periodicals has been in the hands of the different medical officers of the Army in charge of the Library, who have also supervised the selection and purchase of new books. The business of ordering and keeping up the files of periodicals was the special task of the late Mr. Edward Shaw. The reading room, in which the current periodicals are kept, is managed by Mr. H. O. Hall. The Library hall has been successively in the charge of Dr. Thomas A. Wise, Mr. Robert W. Hardy, Mr. Felix Neumann, and Mr. Charles G. Toepper. The correspondence and accounts of the Office have been managed by Mr. F. W. Stone, latterly with the assistance of Mr. George A. Ninas. The general disposition of the library work in relation to the clerical employees and messengers has been successively in the hands of Mr. C. P. Clark, Mr. Lewis H. Rose, and Mr. Frank B. Martin. Since 1908, Mr. Felix Neumann has been in charge of the ordering, accessioning, and carding of books, and, in cooperation with Mr. Charles A. Hastings (Library of Congress), of the new printed files of current book and pamphlet titles. Translating of foreign languages has been done by Messrs. Frederick L. Apel, P. G. Wallmo, Edgar A. Tibbetts, Felix Neumann, Dr. Frank J. Stockman (Scandinavian languages), and Dr. Baruch Israeli, who is in charge of translations from the Russian and Slavic languages. The Museum collection of medical medals, coins, and jetons is now in the hands of Dr. Albert Allemann, assistant librarian, Surgeon General's Office, and a *catalogue raisonné* of this collection may some day be printed.

Since the date of Dr. Billings's retirement from active service in the Army (1895), the successive librarians of the Surgeon General's Office have been Lieut. Col. David L. Huntington (1896-97), Major James C. Merrill (1898-1902), Major Walter Reed (1902), Col. Walter D. McCaw (1903-1913), and the present incumbent.

A Third Series of the Index-Catalogue, comprising the author titles on hand up to July 1, 1916, and the accumulated series of subject bibliographies, is in preparation. Through the courteous cooperation of Hon. Herbert Putnam, Librarian of Congress, all titles of books and pamphlets coming into this Library after July 1, 1916, will be printed by the Library of Congress on their standard size cards and kept in the Library hall in special file cabinets. The classification of subjects employed in these cards is that used in the Library of Congress. Duplicate copies of these cards can be obtained from the Library of Congress at small cost. As these printed cards will undoubtedly be of great use to medical and public libraries, as well as to private collectors, in keeping up the records of current medical books and pamphlets in their files, the cooperation of physicians and medical librarians with this project is requested. The current literature of articles indexed in medical periodicals and transactions, as also the current medical books and pamphlets, will be found, as formerly, in the monthly numbers of the *Index Medicus*.

Very respectfully,

C. C. McCULLOCH, JR.,  
Lieutenant Colonel, Medical Corps, U. S. A.,  
Librarian, S. G. O.

ABBREVIATIONS OF TITLES  
OF  
MEDICAL PERIODICALS  
EMPLOYED IN THE  
SECOND SERIES  
OF THE  
INDEX-CATALOGUE.\*

---

**EXPLANATIONS:**

The abbreviations are prepared as far as possible in accordance with the following principles:

1. To follow the exact order of the words of the title.
2. To make them as brief as is consistent with clearness to those who are familiar with medical literature.
3. To follow strictly the orthographical usages of each language. This disposes of the question of capitalization.
4. To attain uniformity.

Some exceptions to this last rule have been found expedient. An abbreviation which is quite intelligible in the body of a title is not always suitable as the first word, and the context may make an abbreviation sufficiently clear in a long title which in a short one would appear obscure. The convenience of the reader is regarded as of more importance than a rigid adherence to uniformity. The following minor details, with the list of single-letter abbreviations, will assist in the comprehension of the scheme:

The article with which a title commences is omitted.

Prepositions as well as articles are entirely omitted in English titles, and in other languages when their elision would not lead to obscurity.

The place of publication is not added when it forms an integral part of the title; in such cases it is given without abbreviation, except in instances of constant recurrence, as London, Paris, Berlin, etc., which are condensed into Lond., Par., Berl., etc., on all occasions. Nor is it added to the titles of Transactions or Journals the places of publication of which have been changed from time to time, as the references in each instance furnish the locality.

The reader seeking explanation of an abbreviated title will find it under its first word (article excluded) in its alphabetical place in the list.

WATKINS.

**Waterworth (William)** [1851-1904].

Obituary. *Am. Med.*, Phila., 1904, vii, 806.

**Wathen (John Hancocke)** [1844-1906].

Obituary. *Bristol M.-Chir. J.*, 1906, xxiv, 386. Also: *Lancet*, Lond., 1906, ii, 1035.

**Wathen (John R.)** [1872- ]. Normal histology. A manual for students and practitioners. Series edited by V. C. Pedersen. 229 pp. 12°. *Philadelphia & New York, Lea Bros. & Co.*, 1903.

— The present status of the treatment of exophthalmic goiter. pp. 147-150. 8°. *La Grange, N. C.*, 1908.

Repr. from: *South. M. J.*, La Grange, 1908, i.

**Wathen (Jonathan)**. An answer to the letter of Mr. Keyser, surgeon and chemist of Paris, in which the insufficiency of his medicine for the cure of the venereal disease is further considered; also, some of the evidences of the anonymous author of the parallel are produced, and confirmed by the testimony of M. Faber, president of the Company of Surgeons, and counsellor to the committee of the Royal Academy of Surgery in Paris. 3 p. l., 34 pp. 12°. *London, J. Rivington*, 1763.

Bound with: *BOERHAAVE's* accademical lectures on the lues venerea [etc.]. 12°. *London*, 1763.

— Practical observations concerning the cure of the venereal disease by mercurials; to which is added a letter to Peter Collinson, containing an account of an ear of dog's-grass that was swallowed by a child, and afterwards discharged on its back. 2, ed. xv, 71 pp. 12°. *London, J. Rivington*, 1765.

Bound with: *BOERHAAVE's* accademical lectures on the lues venerea [etc.]. 12°. *London*, 1763.

**Wathen (William Hudson)** [1846-1913]. Treatment of intraligamentous and retroperitoneal uterine myomata. 4 pp. 8°. *New York*, 1896.

Repr. from: *Am. Gynec. & Obst. J.*, N. Y., 1896, ix.

— Treatment of uterine myomata and diseases of the uterine annexa per vaginam. 6 pp. 8°. [*New York*, 1897.]

Repr. from: *Am. Gynec. & Obst. J.*, N. Y., 1897, xi.

— Vaginal hysterectomy for uterine myomata and diseases of the adnexa. 12 pp. 8°. *Philadelphia*, 1897.

Repr. from: *Tr. Am. Gynec. Soc.*, Phila., 1897, xxii.

— Operation for uterine myoma by the vagino-abdominal method; iodoform poisoning. 4 pp. 12°. [*New York*, 1898.]

Repr. from: *Med. Times*, N. Y., 1898, xxvi.

— Abdominal and pelvic surgery. Extracts from clinical lectures and society transactions. 24 pp. 8°. *Louisville, Ky., J. P. Morton & Co.*, 1898.

— Curettage of the uterus. 6 pp. 12°. [*Philadelphia*, 1898.]

Repr. from: *Phila. M. J.*, 1898, i.

**Wathen (William Hudson)**—continued.

— Congenital imperforate anus with fecal impaction extending above the umbilicus. 1 l. 8°. [*Louisville*, 1898.]

Repr. from: *Louisville M. Month.*, 1898-9, v.

— A brief report of some interesting surgical cases. 16 pp. 8°. *Louisville*, 1900.

Repr. from: *Am. Pract. & News*, Louisville, 1900, xxx.

— Minimum requirements for admission to a medical college. 9 pp. 12°. *Philadelphia*, 1903.

Repr. from: *Am. Med.*, Phila., 1903, vi.

— Timely operation in primary appendicitis. 10 pp. 8°. *New York*, 1903.

Repr. from: *Med. News*, N. Y., 1903, lxxxiii.

— Doctorate address. Relation of academic to medical education; the typical physician. 11 pp. 8°. *Louisville*, 1903.

Repr. from: *Am. Pract. & News*, Louisville, 1903, xxxvi.

For Biography, see *J. Am. M. Ass.*, Chicago, 1913, lxi, 1550. Also: *Kentucky M. J.*, Bowling Green, 1913, xi, 1043-1045 (L. S. McMurtry). Also: *Louisville Month. J. M. & S.*, 1913-14, xx, 188.

**Watin (Paul)** [1869- ]. \*Traitement des coliques hépatiques par l'huile d'olive. 39 pp., 1 l. 4°. *Paris*, 1895, No. 463.

**Watkins (C. E.)** Chronic diseases and how to cure them. 71 pp., port. 12°. [*n. p., n. d.*]

**Watkins (John Webb)** [1833-1903].

Obituary. *Lancet*, Lond., 1903, i, 484.

**Watkins (Lyman)** [1854-1912]. An eclectic compendium of the practice of medicine. 457 pp. 12°. *Cincinnati, J. M. Scudder's Sons*, 1895.

For Biography, see *Eclect. M. J.*, Cincin., 1912, lxxii, 130-132 (H. W. Felter).

**Watkins (Robert Lincoln)** [1863- ]. Diagnosis by means of the blood. 388 pp. 8°. *New York*, 1902.

**Watkins (Thomas) James** [1863- ]. Vaginal section and drainage for pelvic abscess, with report of cases. 8 pp. 8°. *New York*, 1895.

Repr. from: *Am. J. Obst.*, N. Y., 1895, xxxii.

— Technic of abdominal salpingo-oöphorectomy without pedicle. 19 pp. 12°. *New York*, 1896.

Repr. from: *Med. News*, N. Y., 1896, lxix.

— Drainage in abdominal section for pelvic disease. 6 pp. 8°. *New York*, 1896.

Repr. from: *Am. Gynec. & Obst. J.*, N. Y., 1896, viii.

— Treatment of endometritis. 7 pp. roy. 8°. *New York*, 1897.

Repr. from: *Am. Gynec. & Obst. J.*, N. Y., 1897, x.

— Tampons and pessaries in the treatment of displacement of the uterus. 4 pp. roy. 8°. *New York*, 1899.

Repr. from: *Am. Gynec. & Obst. J.*, N. Y., 1899, xiv.

— Gynecologic diseases. Some points in the diagnosis of the more common ones. 11 pp. 8°. *Chicago*, 1899.

Repr. from: *J. Am. M. Ass.*, Chicago, 1899, xxxii.

**Watkins** (T[homas] J[ames])—continued.

1. Gonorrhea in women. [Also:] 2. Gonorrhea in children, by I. A. Abt. 3. Pathology of gonorrhea and treatment of some surgical complications, by D. N. Eisendrath. 4. Why is gonorrhea still a much dreaded disease? By F. Kreissl. 30 pp. 8°. [Chicago, 1899.]  
1., Repr. from: Am. J. Surg. & Gynec., St. Louis, 1898-9, xi, 2, 3., 4., Repr. from: Chicago M. Rec., 1899, xvi.

**Watkins** (V[ictor] E.) Neurasthenia among blondes in the Southwest. 3 pp. 12°. [New York], 1905.

Repr. from: N. York M. J. [etc.], 1905, lxxxi.

**Watkins** (William Hamilton) [1848–1902].

Obituary. J. Am. M. Ass., Chicago, 1902, xxxviii, 1527.

**Watkins Glen.**

GLEN (The) Springs, Watkins Glen, N. Y. 16°. Buffalo, [n. d.].

**Wat moeten wij nalaten en doen?** Populaire raadgevingen bij het dreigend gevaar der cholera, door een practiseerend doctor en arts. 15 pp. 8°. Haarlem, J. P. Haesker & Co., [n. d.].
